### What's new:

**(Nintendo DS) Review Shogun's Empire is an entertaining RTS for the Nintendo DS/iQue. Simply put, the sheer amount of content and level design make this a winner. I'm looking at the top down strategy game from Paradox Development Studio and I really like what I see -- a team of smart developers clearly at home at the RTS genre. The gameplay reels me in immediately, thanks to its familiar interface, accessible and fun gameplay, and sheer amount of content. I'm intrigued by this newest entry into a long-running franchise; the game's publisher has obtained an early version and time will tell if this is an Editors' Choice pick. A Simple RTS Game Blitz games are known and loved for their good music and barebones gameplay, and they are fun to play. While the Blitz games are great, I think Paradox Development Studio has captured the spark of the Blitz games and taken it to a more polished arena -- the stand alone RTS. The main screen in this game contains four distinctly different areas: a top down view of base construction; the main map of your gameplay; an options menu; and the game save. The top down view and main map is where you can zoom in or out, view the map, and begin building or launching your units into battle. The main map can be zoomed in further to view all the units present in the game, and you can also turn the camera up and down to view your units in battle. The save screen is where you can save your game. The gameplay and user interface are familiar to anyone who has played a Blitz game or Runescape. While this game technically runs in real time, the interface for**

training, and management of resources makes it feel more like a turn-based game. The controls are very intuitive. Left and right allows you to move a unit, while the bumpers in the top corners of the screen gives you the option to select units. The cursor is also available to pick up objects on the map, and you have the option to pull out an effect on a unit similar to a healer in a Nintendo DS role playing game. A bar at the bottom of the screen shows your building progress and income -- thus, we have a top down game with a typical non-real-time interface. The menu allows you to select units (each time you do, you call forth that unit's special ability such as the summon pet ability in Nintendo DS

Esthetic Implants Implant prosthetics are the latest and greatest in modern technology. Implants are surgically placed in the jawbone where roots are missing (for example: jaw loss due to tooth extraction), or not present (for example: maxillary sinus lift procedures). In both situations, a titanium dental implant is used to provide a foundation where new roots can grow, providing a tooth-like replacement for the site. Here's how they work: A customized denture, in the form of a removable, one-piece, or two-piece shell, is made from porcelain or resin and fitted into the implant fixture. Both materials provide a cosmetic and functional replacement for the original tooth or teeth in the affected area. Permanently fixed bridges require the framework of the implant fixture to be cemented to the patient's remaining teeth. This framework holds the pontic (bridge) in place while the gingiva heals. The pontic is typically made from acrylic resins or porcelain. Some patients choose immediate implants. Unlike a conventional

**implant, where the implant is inserted into the jawbone after a period of several weeks, implantation takes place immediately after tooth extraction. In this case, the jaw bone is re-grafted to provide a base for the implant. Benefits of implants Periodontal disease is a serious health problem that may cause tooth loss. Even a small loss of tissue around a tooth may cause the tooth to loosen and move. Damaging bone supporting the teeth often leads to advanced periodontal disease, which requires expensive tooth loss replacement. Implants put an end to this problem. For patients with extensive bone loss, implants are an important solution. Your dentist can determine if implants are appropriate for you by examining the bone structure in your jaw. If you have chronic gum inflammation, implants may not be a good option for you, so see your dentist for a Periodontal evaluation. With dental implants, patients avoid extraction surgery and the accompanying risks and discomfort**
