I was thinking about creating links on my website, like : www.mypage.com/en/en/1 I would like to know if it is possible to have a module/function in the drupal for this. I try to find some informations about it, but I can't found a way to do it. A: Rather than using permalinks, I'd recommend using routing to have your website be accessible in any language. To do that, set up routing rules for your chosen language. In particular, I would suggest you enable the Language module. You can create your own route in the module e.g. routing.yml: en: path: / defaults: _controller: '\Drupal\contact\

Financial Accounting R Narayanaswamy Pdf Download 12
