Glucocorticoids (GCs) have been implicated in synaptic development in the hippocampus. Here we report that dexamethasone (DEX) modulates N-methyl-D-aspartate (NNDA)-dependent synaptic transmission in developing cultures of hippocampal neurons. DEX treatment before and after development increases NMDA-receptor-mediated currents (NMDAR currents) and depresses the decay of the NNDAR-mediated current. This effect is reversed by RU486, a competitive antagonist of GR. We found no effects of DEX on AMPA-receptor-mediated currents or on evoked excitatory postsynaptic currents (EPSCs). We further observed that DEX increases the surface expression of NMDAR subunit GluR1 in dissociated neurons. DEX also decreased levels of GluR1 mRNA and GluR1 protein in neuronal cell lysates. In contrast, DEX did not affect GluR1 subunit levels in brain tissues. Our data suggest that GCs modulate synaptic transmission in developing cultures, perhaps by modulating NMDAR subunit surface expression About a month ago; I varied socumentary on the issue of global warming, "Climate Hustle." The film is a work of propaganda, and if s a model of how to go about manufacturing a false and misleading narrative. Fund has provided me with some more information about it. The film is sponsored by the Heartland Institute and the Competitive Enterprise Institute. It had its world premiere in November 2014 in the New York City area, but its national distribution is limited. ("The movie is making its way from our offices to major cities around the country." - Heartland Institute.) Since then, there has been a lot of media interest in the film, in part because some of the sponsors — the Koch brothers — have been in the news a lot recently. A lot of it focused on the screening of the film at the 2014 Conservative Political Action Conference (CPAC). It was then that Ti
